Boston, MA 02110

Re: Boston Edison Company, D.T.E. 03-112

Dear Secretary Cottrell:

Enclosed please find the responses of Boston Edison Company d/b/a NSTAR Electric ("Boston Edison" or the "Company") to the following information requests of the Department of Telecommunications Energy in the above-referenced proceeding: DTE-1-2, DTE-1-4 and DTE 1-6. The Company filed its responses to the remainder of the Department's information requests on January 7, 2004.

Thank you for your attention to this matter. Please contact me at your convenience if you have any questions relating to this filing.

Very truly yours,

David S. Rosenzweig

#### **Information Request DTE-1-2**

Refer to Exh. NSTAR-BKR-1, at 5. The Company states that it agreed to "treat costs associated with the Property as a component of its transition charge and to return the net proceeds of any subsequent sale in the Residual Value Credit."

- A. Please provide a detailed account of the historical ratemaking treatment for the Property.
- B. Please explain why, in the Company's Restructuring Settlement, in Boston Edison Company, D.P.U./D.T.E 96-23 (1998), it was considered appropriate to include the net book value associated with the Property as part of the fixed component of the Company's transition charge.

#### Response

- As noted in response to Information Request DTE-1-1, the Property has A. never been used for utility purposes, and thus, the costs of the Property were not recovered in the Company's rates prior to approval of the Company's Restructuring Settlement in Boston Edison Company, D.P.U./D.T.E. 96-23 (1998).
- The Company's Restructuring Settlement included the requirement to sell В. LaGrange Street property and credit the net proceeds to customers. The LaGrange Street property was neither generation property nor property that had been included in rates, and thus, the Company was not obligated by statute to use the above-market value of the property to mitigate its transition costs. However, as part of the settlement discussions that resulted in the Restructuring Settlement, the Company agreed to sell the property and use the above-market proceeds to mitigate transition costs. In order for the Company's customers to receive the benefits of the value of this non-utility property, it was appropriate to begin to account for the LaGrange Street property as if it were utility property. Accordingly, consistent with the accounting for the sale of utility property, the parties agreed that the net book value of the property would be included in the fixed component of the Transition Charge (Settlement Agreement page 245, line 21); when the property was eventually sold, the net proceeds would be used to mitigate the Transition Charge.

Boston Edison Company

D.T.E. 03-112

Information Request: **DTE-1-2** 

January 8, 2004

Person Responsible: Bryant K. Robinson

Page 2 of 3

In responding to this Information Request, the Company has reviewed the historical accounting of the LaGrange Street property and has discovered a mistake in its initial filing that inures to the benefit of customers. In the calculation of the net proceeds that it proposes to return to customers as a result of the proposed sale, the Company reduced the gross proceeds by the full book value of the property. This was based on the (faulty) conclusion that the Company's customers had not paid any of the book value through the transition charge. The reason that the Company mistakenly concluded that customers had not paid for the book value is related to the securitization of the Company's fixed transition costs, as approved by the Department in D.T.E. 98-118.

In D.T.E. 98-118, the Company had initially proposed to securitize all components of its fixed transition costs, including the book value of the LaGrange Street property. D.T.E. 98-118, at 20 fn.18. The Attorney General and DOER objected to the inclusion of the LaGrange Street property in the securitization and the Company withdrew that portion of the securitization request. <u>Id.</u> Because the LaGrange Street costs were not securitized and because after securitization the fixed transition charge did not include any costs other than the securitization amounts (see, e.g., D.T.E. 03-117, Exhibit BEC-JFL-1, page 3), the Company mistakenly concluded in preparing this case that customers had not paid for the book value of the property. However, the Company had overlooked another adjustment to the transition cost accounting that it made subsequent to the Department's order in D.T.E. 98-118.

In the Company's true-up of the securitization amount pursuant to D.T.E. 98-118, the Company reconciled the present value of the fixed component of the Transition Charge with the Securitization amount, net of issuance costs. Because the size of the issuance and relative uncertainty of the issuance costs, it was not possible to project the exact size of the issuance costs. The difference between the estimate and the amount that was actually incurred was booked to the variable component of the Transition Charge. Since the book value of the LaGrange Street property that was included in the transition charge was not securitized, it was included in the net balance booked to the variable component. This method of limiting the fixed component to the securitization amount was shown in the 15 percent true up filing (see Attachment DTE-1-2(a)) and discussed extensively by Mr. Lubbock in hearing testimony in D.T.E. 99-107, pages 704 through 712, where he indicates his understanding that the

Person Responsible: Bryant K. Robinson

Page 3 of 3

Attorney General agreed with the limitation of the Fixed Component to the Securitization amount and all other items to be cleared through the Variable Component (see Attachment DTE-1-2(b)). The settlement agreement with the Attorney General provided for all Fixed Component true-up items to be collected through the Variable Component (see Attachment DTE-1-2(c)). Thus, both the recovery of the LaGrange Street book value, as well as true ups to the Pilgrim net proceeds were moved from the Fixed Component to the variable component of the Transition Charge, just as the recovery of the L'Energia buyout quantity was moved from the variable component to the fixed component.

In this manner, the book value of the LaGrange Street property that had not already been collected through the Fixed Component of the Transition Charge was included in the variable portion of the Transition Charge, and has been paid by customers. This has two implications on the ratemaking proposal in this filing. First, because the book value has already been recovered from customers, Exhibit NSTAR-BKR-4, included in the Company's initial filing, should be revised by inserting a "\$0" in Line 2, and deleting the figure "\$787,400" (see Attachment DTE-1-2(d)). Second, the fact that the book value of the LaGrange property has been collected through the variable component of transition costs is consistent with the Company's proposal that the flowback to customers of the net proceeds of the sale follow the recovery method through the variable component of the Transition Charge.

Exhibit BEC-1 (Update of Exh. BEC-1 in DTE 98-111) at page 2 of 12, as attached hereto, shows the following information:

<ul> <li>Potential balance to be securitized</li> </ul>	\$690.8
Actual Amount Securitized	\$690.5
• Amount to be recovered in Variable Component	\$0.3

Page 12 of 12 of the Exhibit shows the remaining \$0.3M to be recovered in the \$8.3 net adjustment to Page 5 Column O in the Variable Component.

A further breakdown of the calculation is as follows:

Potential balance to be securitized	\$690.8
• Less unrecovered LaGrange costs to be recovered through Variable Comp.	- \$0.7
Net amount to be securitized	\$690.1
Actual Amount Securitized	\$690.5
Amount to be recovered in Variable Component	-\$0.4

Accordingly, the adjustment to the Variable Component may be calculated as follows:

•	Unrecovered LaGrange Street	\$0.7
•	Amount to be recovered (flowed back)	-\$0.4
•	Net Change to Variable Component	\$0.3

This results in the exact same adjustment to the variable component, as demonstrated in the attached Exhibit.

# <u>Update of the Transition (Access) Charge for the Pilgrim Sale, the L'Energia buyout and Securitization</u>

#### **Overall Description of the Exhibit**

This schedule incorporates adjustments resulting from the Pilgrim Sale, the buyout of the L'Energia contract and Securitization. Given the complexity of the filing and the necessity of truing up the estimates in this filing, the Company is not asking for final approval of the amounts at this stage. Rather, the final approval of these amounts will be requested in the annual true up filing for 1999.

#### Page 1. Summary

This page shows updates from the filing made in DTE 98-111 and the column I "Current Access Charge" is taken from Exhibit BEC-1 Page 1 Col. H in that filing. The recalculated fixed component items (Columns C and D) are taken from page 2 of this filing and the recalculated variable component items (Columns E and F) are taken from page 3 of this filing. The total recalculated Access Charge components are shown in Columns G and H and represent the total of the fixed components and the variable components. The change in the access charge in cents / kWh is shown as the difference between the New Access charge and the Current Access Charge. Customer savings in millions of dollars result from multiplying the Sales in Column B by the change in the Access Charge in column J.

#### Page 2, Fixed Component

This page shows the change in the Fixed Component as follows:

- a) line 2 is split into 2 and 2a to reflect the date the securitized funds were received.
- b) elimination of the "transportation in support of remote generating assets" in column D as a result of the sale of the fossil units"
- c) Updated Pilgrim Residual Value Credit in Column K. This also incorporates the buyout of the L'Energia contract. Calculation of this column is shown on page 7.
- d) The present value of the updated Net Fixed Component in column G at a 10.88% discount rate to give a total NPV of the fixed component of \$702.6 million as shown at the foot of the page.
- e) The actual net amount securitized was slightly less than the \$702.6 million being \$725 million less estimated transaction cost of issuance of \$34,243,400 and less original issue discount of \$244,860 as shown on attachment 1 of the Company's Issuance Advice Letter to the Department filed July 28th, 1999. Thus the net amount securitized was \$690.5 million.
- f) The straight line amortization of the securitized amount is shown in columns M and N which add to the required securitized cash flow shown in column H. This new amount is the only fixed component remaining and the Company proposes to recover the slight shortfall between the securitized amount and the amount available for securitization in the variable component of the access charge along with any true up of the above components in items a) through d). This will keep the fixed component of the access charge as an unchanged component and a simple calculation going forward.
- g) The securitization savings are calculated as the difference between the fixed component of the Access Charge prior to securitization (Col.G) and the amount after securitization (Col.I). The savings amount is shown in Column D and present valued at the foot of the column to show securitization savings of \$75.8 million.

#### Page 3. The Variable Component

This page shows the change in the Variable component as follows:

- a) the Pilgrim sale eliminates the Nuclear decommissioning costs in Column B.
- b) columns C, D and E are increased for the buyback contract from Pilgrim which was shown in the Pilgrim Divestiture filing Docket No. DTE 98-119, (Information Request No. DTE-3-18), and columns C, D and E are decreased by the L'Energia buyout as shown in Docket No. DTE 99-16, (Information Request No. AG-1-8).
- c) The reconciliation amount in column M is derived on page 6.

#### Page 4. Mitigation Incentive

This page shows the mitigation incentive that the Company earns based on its reduction of the Access Charge rate. The recalculated Access Charge shown page 1 is calculated into a cumulative rolling average and then the resulting average is used to read the mitigation amount from the table based on the year in question.

#### Page 5. Variable Component - Reconciliation Adjustment

This page shows changes as follows:

a) the Pilgrim sale eliminates the Nuclear decommissioning costs in Column H(a).

- b) the Pilgrim Sale increases the purchased power costs in columns I and J whereas the L'Energia buyout reduces these costs. These are the same as the amounts on page 3. The reconciliation amount in column M is derived on page 6.
- c) The adjustment in column O is detailed on page 12.

#### Page 6. Variable Component - Reconciliation Adjustment deferral charges

This pages adds adjustments to the variable component for: deferral of the Access date (open access began 3/1/98 instead of the date on the schedule which was 1/1/98 in accordance with the settlement agreement), costs of Generation related transmission; and the access charge mitigation incentive. It also calculates the carrying charge on over or under-collections of the access charge.

#### Page 7. Pilgrim Residual Value Credit

The preliminary Pilgrim Residual Value Credit was used to set the balance for the securitized amount. The actual amount of the present value of the Pilgrim Residual Value Credit was slightly different and the differences are explained on page 12. We propose to finalize the fixed component at this stage to tie it to the securitization only and to true up any adjustments through the variable component. This allows the fixed component to be a very simple calculation that ties to the securitization.

#### Page 8. Pilgrim Residual Value Credit - Deferred Tax Component

This page calculates the difference between the book value of the divestiture proceeds (negative) and the elimination of the tax book value of Pilgrim previously included in the Access Charge calculation. Because when Pilgrim is sold the tax book value of Pilgrim goes to zero, the balance in the calculation of the access charge must also go to zero. In simple words, the Company receives a tax deduction for funding the decommissioning account as an expense as well as a tax deduction for selling Pilgrim. This is reflected in the estimated tax deduction of \$498.8 million in column H translating into a reduced tax payment of \$195.7 million in Column I. This amount decreases each year as the company collects the deficit in divestiture proceeds from customers (column d) and decreases as the Company assumed that the net tax book value of Pilgrim would decrease as the plant aged (column G).

#### Page 9. Pilgrim Residual Value Credit - Carrying Charge

The carrying charge on the negative proceeds is calculated on the remaining balance of the negative net proceeds less the deferred tax balance. This average balance is multiplied by the allowed return of 10.88% to arrive at the annual carrying charge amount.

#### Page 10. Variable Component - Power contracts - GWH obligation

The GWH obligation reflects the Pilgrim power purchase as shown in DTE 98-117 and the elimination of the L'Energia power purchase as shown in DTE 99-16.

<u>Page 11. Variable Component – Power contracts – obligation in millions of dollars</u> The obligation reflects the Pilgrim power purchase and the elimination of the L'Energia power purchase.

# <u>Page 12. Variable Component - Revenue Credits and Damages, Costs or Net Recoveries from Claims</u>

This page takes the Pilgrim Residual Value credit amount from Exhibit BEC-2 of \$245.5 million. This credit is negative because the decommissioning fund is funded today rather than being funded over time. It also includes the buyout of the L'Energia contract. The total of these amounts differ from the Pilgrim Residual Value credit calculated on page 7 and will continue to change slightly as the final numbers are received, reviewed and approved by the Department. Also included on this page is the credit from NEIL and from the Municipal contract customers. While the Municipal contract customers credit has been included at \$2 million a year, there is a potential settlement at FERC that is likely to convert this to a lump sum payout of about \$25 million. The proposed settlement is not yet signed and we propose to include this adjustment in a subsequent true-up.

19

Q. Will you turn to the prefiled testimony of Mr. Martin, page 10, specifically line 1, starting with the sentence "The company proposes that any future change to the securitization bond be credited or debited to the variable component." Do you see that?

A. [LUBBOCK] Yes, I do.

Q. Based on your earlier testimony, this proposal is based on the discussion of the parties before the filing was made?

A. [LUBBOCK] For the life of me I can't really remember how much we discussed that in the 14 Pilgrim sale discussions. If we discussed it with any party, it would have been with the Attorney General. I don't think there was an active interest on the DOER's part and I can't remember the extent of discussions we had, if any, on that particular issue.

20 And let me correct this too. What it's 21 really supposed to say is the company proposes that any future changes to the securitizable balances or 22 23 the fixed-component balances, because the securitization at the moment, the bonds are known;

General is in favor of this, but I cannot speak for 2 the Attorney General. To the best of my

3 understanding, the discussions were very informal; 4 they were not put in the form of a proposal, do you 5 agree. It was more discussion of this is what we're

6 trying to do, this is why we believe it makes sense. 7 Q. You indicated earlier in your response to

the questions of Mr. Daley that the recovery of 8 9 costs, whether it is to be done through the fixed or variable component, had zero impact. Would you 10 11 elaborate on that statement?

A. [LUBBOCK] Yes. If the company recovers its money over time it receives a carrying charge from the customer. If it receives its money today, it gets its money without a carrying charge. In the reverse, if the company flows money back to customers, they get it today and the company doesn't pay a carrying charge. And if we give it back to customers over time, the company pays a carrying

charge. So the carrying charge is designed to be neutral to the customers and neutral to the company. So there should be no incentive on Boston Edison's part to move all the variable component to the fixed

Page 705

the bonds are fixed. The bonds can't change. Interest on the bonds can't change. So the securitized bonds are not going to change. So with

3

4 that modification, I'd say it's correct.

5 Q. And similarly if you turn to page 7 of that testimony, Exhibit BEC-RHM, and that page starting on line 15 states that "The fixed component presented in this filing and future filings reflects the schedule of amortization and interest and 10 expense for the proceeds received on July 28, 1999, 11 for the five series of rate reduction bonds that were issued to refinance the fixed component as it 12 13 is described in (1) above." And then the following 14 sentence sates "All adjustments to the fixed 15 component are adjusted through the company's 16 variable component." Do you see that? 17

A. [LUBBOCK] That's our proposal, yes.

Q. Again, same question. Was this proposal to recover the adjustment to the variable component discussed with the parties?

20 21 A. [LUBBOCK] Again, if it's the same

adjustment, I just can't remember how much we 22 23 discussed it. I am aware of more recent discussions

after the hearings that I believe the Attorney

component, nor should there be any incentive to move all the fixed component to the variable component.

3 The carrying charge for the fixed component keeps 4

the company and/or the customer whole and the 5 variable component is cash, so that's cash on the

6 barrelhead; whoever gets the money gets it

In particular, if you're looking at small numbers there, you're looking at interest, which is a fraction of a small number.

11 Q. Could the company provide the Department a 12 list of items and the corresponding amounts that are 13 supposed to be recovered through the fixed component 14 as provided for in the settlement and which the 15 company is proposing to recover in the variable 16

component?

A. [LUBBOCK] Yes, we can.

18 MR. STEVENS: Mr. Robinson, do you have 19 something to add? 20

WITNESS ROBINSON: No.

21 WITNESS LUBBOCK: We believe that the only 22 items are those that are reflected in BEC-4, page 1

23 of 12, items 1 and 2.

MR. STEVENS: Items 1 and 2, the PRVC?

Page 708

WITNESS LUBBOCK: That's Pilgrim residual

2

9

10

11

12

13

14

15

16

17

18

19

A. [ROBINSON] Lines 1 through 11 and lines 13 through 17.

Q. So that's all of those items? There are no other items that are supposed to be recovered in the fixed aside from those shown on page 1 of Exhibit BEC-4. Is that correct?

A. [LUBBOCK] Yes, with one exception, I believe. You have to realize that the settlement agreement is somewhat of a living document because obviously we anticipated many things but we couldn't anticipate everything with total vision.

20 I believe there's a category that is on 21 BEC-1, page 5 of 9, column K; for those with wonderful eyesight it says "actual purchased-power 22 23 contract buyouts." It was envisaged at the time we did that that the purchased-power contract buyouts

Page 710

Page 711

O. When you said October hearings, what are you referring to?

3 A. [LUBBOCK] The hearings when we went 4 through the Pilgrim sale and the securitization, which was really joint proceedings, we talked about 5 being able to securitize that, increase the amount 6 7 of money we securitized so that the transaction 8 costs would be lower because you're securitizing 9 more and we'd be able to flow the benefit of about

10 \$70 million with an interest differential of, call it 7 to 10, 7 to 11, so 3 to 4 percent. So there's 11 12 an interest there of an extra two-million-dollar 13 benefit from securitizing the L'Energia contract.

Department in DTE 99-16 and that hearing was running at approximately the same time as the Pilgrim securitization hearings. But in summary what I'm saying is that we didn't go exactly by the settlement agreement in securitizing that particular item. It would have to be in the fixed component of the access charge to securitize it.

The L'Energia sale was approved by the

MR. WERLIN: I'm sorry. Just for the record, in the securitization order, DTE 98-118, the 24 Department explicitly permitted the securitization

would be flowed through the variable component of

the access charge. In this particular instance we

3 had a significant buyout, which was L'Energia, and

we proposed that we should be able to securitize

5 that. The way that we securitized that is by

putting it into the fixed component of the access

7 charge. And in securitizing that, the benefit to

8 the customer is that we would've kept that in the

9 variable component of the access charge probably for

10 several years where it would have earned 10.88

percent. Instead, we moved it over to the fixed 11

component of the access charge and the customers got 12

13 the differential in carrying charge, which is 14

approximately 7 to 10.88 percent.

15 So we did that. It was effectively a 16 modification -- Well, it wasn't the way the 17 settlement agreement was originally written, but it 18 provided additional benefits to customers doing it 19 the way we did. We presented it in our Pilgrim hearings as to why we were doing that. But if you 20

21 go very strictly by the clearest instructions that 22 we had in the settlement agreement, you could say

23 that we were unable to securitize it and we were

24 unable to pass on the savings to customers. Page 709

of the L'Energia costs.

BY MR. FRANCISCO: 2

3 Q. So the L'Energia cost is an example of 4 where you moved costs from the variable to the 5 fixed?

[LUBBOCK] Right. A.

6 7 And initially the question I had was more the fixed being moved to the variable. Are there any other --

A. [LUBBOCK] The reason that I mentioned 10 that is if you look at the second line here, we said 11 Pilgrim residual value credit but --12

13 BY MR. STEVENS:

Q. What exhibit are you referring to,

15 Mr. Lubbock, again?

A. [LUBBOCK] I'm sorry. Let me back up a 16 17 bit. On Exhibit BEC-4, page 1 of 12, we said that

18 the items that moved from the fixed to the variable

19 component, which may be plus or minus, by the way,

20 were the Pilgrim residual value credit on line 1

through line 11 and the fossil residual value credit 21

on line 13 through 17. And one item that's included 22

23 there is on line 3, the L'Energia credit. That's

24 really technically not part of the Pilgrim sale. It

5

6

7

Page 712

Page 714

A. [ROBINSON] Costs related to the 1 transformer project are deferred; I don't know which 2

account. I believe it would be a 182 account, but that's subject to check.

MR. STEVENS: Want us to give you a minute to check it?

BY MR. DIAZ:

8 Q. Actually, can I take you to one of the 9 pages in your report? That would be page 233 and that would be line 5. Are we talking about the same 10 number here? 11

A. [ROBINSON] Yes, I believe so. Again, 12 13 subject to check, that should be it.

Q. There's a slight difference there. 14

15 BY MR. STEVENS:

Q. Could you read that number into the record 16 17 just to be clear, Mr. Robinson? You're reading line 18 5 on page 233 of, what is that, the miscellaneous

19 deferred debits account?

20 MR. DIAZ: The company's 1999 FERC Form 1 21 annual report, page 233, and the category is

miscellaneous deferred debits. 22

23 A. [ROBINSON] Yes. The amount in column F of line 5 of page 233 of the FERC Form 1 is

as part of the adjusting items. So the reason I was discussing the L'Energia credit is that it technically should not be there. So when Mr. Robinson and I were mentioning that all the items between line 1 and line 17 are fixed moving over to variable, that's

just happened to go through at about the same time,

was rolled into the same securitization. So for

simplicity's sake we just rolled that one in there

with the exception of line 3. MR. FRANCISCO: Thank you. I have no 11 further questions. 12

MR. STEVENS: Thank you. Mr. Diaz, do you 13 14 have some questions?

MR. DIAZ: Yes.

16 MR. STEVENS: Mauricio Diaz has a few 17 questions, please.

15

24

3

4

5

6

7

8

Q. This is the testimony of Mr. Robinson, 20

21 BEC-BKR, and in the back of that testimony BKR-1.

22 Do you happen to have an annual report, by any

chance, the company's 1999 FERC Form 1? 23

A. [ROBINSON] I do not have it with me.

Page 713

10,046,992.

1 Q. And that's the account for what? What is 2 that identified with?

A. [ROBINSON] In column A it is identified 4 as Pilgrim transformer. 5

What I have here in Exhibit 1 to this rebuttal testimony is an estimate that will not necessarily agree with what's in the Form 1. This was prepared at a point in time where the numbers would not have been exact with the Form 1 at

11 12/31/99.

3

6

7

8

9

10

18

BY MR. DIAZ: 12

That's the only difference? 13

A. [ROBINSON] This would have been provided 14 on an estimated -- This would have been prepared 15

after year-end 12/31/99. 16

BY MR. STEVENS: 17

Q. "This" being?

A. [ROBINSON] "This" being Exhibit 19

20 BEC-BKR-1.

21 BY MR. DIAZ:

22 Q. So the FERC form is more updated?

23 A. [ROBINSON] No, the testimony has an

update of the estimated number that would be in the 24

(Pause) We have it, yes. 2

Q. You do have it?

[ROBINSON] Yes.

MR. STEVENS: Is it part of the record of this proceeding, the FERC Form 1? I believe the Attorney General may have asked for it. MR. WERLIN: This was filed I believe in

the last couple of days.

9 MR. ROGERS: There was an update, I think, 10 yes.

11 MR. WERLIN: As a supplement to 12 information request AG-1-40.

13 MR. STEVENS: Okav.

14 BY MR. DIAZ:

Q. We have discussed a lot of the numbers in 15 here back and forth with different exhibits, so 16

I think it would make it clear to the record and 17 easier for us to go through the numbers if, for 18

19 example, you can indicate the number that you show

here at the bottom of this exhibit, the 10 million, 20

is that a number that you booked or that I can find 21 here in the annual report? Or how do you go about 22

booking that number? How do you reflect that in the 23

FERC Form 1?

Page 715

Attached is an extract from the Company's Settlement Agreement in <u>Boston Edison Company</u>, D.T.E. 99-107 which was the basis for the accounting of the Securitization true-up.

See footnote 1, which states:

"The Settling Parties have attached Settlement Exhibit BEC-4 which incorporates the changes in the Company's initial filing as set forth in this Settlement Agreement. The amounts computed in Settlement Exhibit BEC-4 will be carried forward in future reconciliation proceedings in the schedule identified as Exhibit BEC-1, page 5, column 0 in this case."

Please also <u>see</u> Exhibit BEC-4 from D.T.E. 99-107 (Settlement), attached hereto, which shows the recovery of costs relating to: (1) the Company's former L'Energia contract; (2) Pilgrim; (3) the Securitization difference amount<sup>2</sup>; and (4) the Fossil fixed component true up as being recovered through the Variable Component of the Transition Charge.

Note: Exhibit BEC-1, Page 5 refers to the Variable Component of the Access Charge. Column O has been used for Miscellaneous items.

Note: – this amount changed from the \$0.3M shown on Attachment 1 due to slightly lower closing and accounting costs shown in Exhibit BEC-2 of D.T.E. 99-107.

#### ARTICLE 2

#### TERMS OF AGREEMENT

#### 1999 Pilgrim RFO #12

2.1 The Settling Parties agree to adjust the transition cost recovery associated with RFO #12, as shown in Settlement Exhibit BEC-4, page 7 of 12, line 16 from \$63.520 million (Exhibit BEC-BKR-2) to \$49.770 million. Said reduction in the transition costs recovered by the Company shall not be adjusted further in the future to reflect any additional costs, claims, recoveries or the true-up of any estimated amounts relating to Total RFO #12 Outage Costs. The \$13.75 million reduction in Total RFO #12 Outage Costs flows to the Pilgrim Residual Value Credit ("PRVC") calculation in Settlement Exhibit BEC-4, page 2 of 12, line 25. For purposes of this Settlement the retail share of this agreed-upon reduction is \$10.725 million. This reduction is reflected in Settlement Exhibit BEC-4, page 2 of 12, line 48, and Settlement Exhibit BEC-4, page 1 of 12, line 2, and will be incorporated in the final reconciliation adjustment for 1999.

#### Streetlighting

2.2 The Settling Parties agree to reverse the Company's Streetlighting adjustment in the calculation of its Transition Charge, as originally reflected in Exhibit BEC-4,

The Settling Parties have attached Settlement Exhibit BEC-4 which incorporates the changes in the Company's initial filing as set forth in this Settlement Agreement. The amounts computed in Settlement Exhibit BEC-4 will be carried forward in future reconciliation proceedings in the schedule identified as Exhibit BEC-1, page 5, column 0 in this case.

For purposes of this Settlement, the retail share consists of the sum of Boston Edison's 74.26867 percent share and the municipal share of 3.73133 percent. The Company agrees to refund Commonwealth Electric Company's and Montaup Electric Company's or their successors, pro rata shares of the \$13.75 million reduction in total RFO #12 outage costs.

Page 1 of 2

#### **Information Request DTE-1-4**

Refer to Exh. NSTAR-BKR-1, at 8. The Company states that it "determined that, in order to maximize the proceeds from the sale of the Property, it would provide the two highest bidders the opportunity to participate in a second round of bidding." Explain how and why the Company reached this determination, providing complete and detailed documentation.

#### Response

The first round of bidding produced four conforming bids (see Company response to Information Request AG-1-6 CONFIDENTIAL). At the close of bidding, the Company negotiated with the highest bidder for the sale of the Property. However, such negotiations did not result in the bidder signing a purchase and sale agreement with the Company.

After negotiations with the first round's highest bidder failed, the Company determined that it had three options for proceeding with the disposition of the Property, i.e., (1) begin negotiations with the second highest bidder; or (2) re-open bidding to all first round bidders; and (3) re-open bidding to a subset of the first round bidders. The Company determined that its experience with generation asset divestitures suggested that opening a second round of bidding with first-round bidders would maximize the bids for the Property because bidders in a second round would have an incentive to increase their prior bids in order to prevail. See Boston Edison Company, D.T.E. 97-113, at 9 (1998); Boston Edison Company, D.T.E. 98-119/126, at 14, 18 (1999). Conversely, if the Company had entered into negotiations with the second highest bidder from the first round, it was likely that the bidder would merely negotiate based on its initial bid without incentive to increase that bid significantly. Therefore, the Company determined that opening a second round of bids would maximize the value of the Property.

The Company decided to include only a subset of bidders from the first round in a second round in order to focus the efforts on the bidders who had shown the most interest. The Company narrowed the bidders for a second round to two based on the fact that the third-highest bid from the first round was much further from the Company's price expectations for the Property than the second highest bid (see Attachment AG-1-3(b)). Accordingly, the highest two bidders from the first round were offered the opportunity to bid in the second round. Neither bidder was told how many other bidders were included in the second round of bids,

February 13, 2003

Stephen Carroll Real Estate Manager NSTAR Electric & Gas Corp. One NSTAR Way, SE210 Westwood, MA 02090

Dear Mr. Carroll:

I want to thank you for agreeing to extend the deadline on submission of bids on the Kessler Woods property to June 20, 2003. The additional time will enable the City to put together a plan of action that will allow us to submit a meaningful bid on the land.

I understand that you want to make sure that the City not use the additional time to change laws or regulations regarding the use of the land in a way that might harm NSTAR's interests. I think that NSTAR has been quite responsive and fair in giving us the additional time we have sought, and your objectives are entirely reasonable. In my opinion, engaging in tactics like those you are concerned about would be taking unfair advantage of your generosity.

I will not initiate that kind of action and I will not support it if attempted by someone else.

The City of Newton has asked for additional time to prepare a bid. We expect to submit the best bid without changing the rules of the game.

Very truly yours,

David B. Cohen

Mayor

March 7, 2003

Mayor David B. Cohen City of Newton Office of the Mayor 1000 Commonwealth Avenue Newton, MA 02459

RE:

LaGrange Street property, Newton

The Honorable David B. Cohen:

I want to thank you for your letter dated February 13<sup>th</sup>, 2003 concerning the above-mentioned property. As you know there is a regulatory requirement that Boston Edison Company (d/b/a "NSTAR Electric") dispose of this property at maximum value, with all of the net proceeds generated by the sale flowing to its customers. NSTAR Electric appreciates your understanding that NSTAR Electric's extension of the deadline for the submission of conforming bids is dependent upon the continuing absence of any change in any of the various pre-existing legal and land-use constraints on the Property during the extension period that may in NSTAR Electric's view have an adverse impact on the Property's value. NSTAR Electric's extension of the bid deadline is therefore necessarily subject to NSTAR Electric's reserved right (as set forth in the documentation currently available on the internet website entitled "www.lagrangelandsale.com"), to again unilaterally change its sale process time frames to shorten or extend the same, to change any terms or conditions, to accept or reject any bid and to withdraw the Property from this sale process entirely.

In order to minimize the possibility that any such change might be initiated, we respectfully request that a copy of your February 13<sup>th</sup>, 2003 letter be circulated to each of the following city boards, commissions and offices, so that they may understand your position on this issue: (a) Board of Alderman, (b) Planning and Development Board Sitting as a Board of Survey, (c) Health Commission, (e) Conservation Commission, (f) Building Inspector, (g) Inspectional Services, (h) Zoning Commissioner, (i) and all special permit granting authorities including the Board of Appeals and the Planning Board.

NSTAR Electric's core mission is to serve our electric and gas customers well through dependable service and urgency in restoration response. Our core mission is not real estate development. We anticipate that a successful bidder for the LaGrange Street property will work with the City on the ultimate development plans for the property.

Sincerely yours,

Stephen Carroll

Real Estate Manager

NSTAR
Doug Horan, Esq.
General Counsel
Corporate Headquarters
800 Boylston Street
Boston, MA 02199

Dear Mr. Horan:

We have further reviewed the Environmental Claim submitted by Bell, Boyd & Lloyd, which we received yesterday, June 11th.

It is clearly confirmed, after our reviewed of the Environmental Claim documents, that NSTAR has been withholding important information regarding this matter. It is difficult to believe that NSTAR was not aware of the City of Newton interest in submitting a bld for their property, and the fact the City of Newton had hired an environmental consulting firm to do a study on that same, property.

We, as other interested parties, have spent considerable amount of time and money for legal, engineering, and other various costs to provide a significant offer to purchase this property. The implications of this letter delivered yesterday, could render the land undeveloped and valueless.

To send us information regarding this property yesterday, in such a nonchalant manner, stating this is what we received in the mail two weeks ago, and don't forget to send in your offer next Friday, is unfair or reasonable.

It is apparent that the City of Newton and others had knowledge of the environmental issue or issues and had significant time to review and assess the significance and logalities. These parties will have an unmerited advantage in your bidding process. In fact, we accept as true, that this information has been intentionally dropped at the last minute for this very purpose.

We contend this to be tantamount to an unfair and deceptive trade practice, in violation of Massachusetts General Law's 93A sections 2-11. Since, the Attorney General's Office is already involved in this matter; I would suggest you review this issue with him.

Also, we believe it is only fair the sale of this property be postponed or be subject to a satisfactory study that the land is suitable for reasonable development.

If NSTAR truly wants an open and fair process, then, immediate action must be taken.

Sincerely,

Darrell W. MacLean

Re:

Boston Edison Property at LaGrange and Vine Streets ("Kesseler Woods")

Dear Mr. May:

I am writing this letter on behalf of the City of Newton and Cornerstone Corporation, as a follow-up to the cooperative bid that we recently submitted for the purchase of Kesseler Woods. Given that NSTAR has yet to announce the outcome of the pending bid process, we assume that our bid is still under consideration, and want to reaffirm our interest.

In the event that the ongoing review involves an evaluation of the City's bid against other bids in similar amounts, we would ask that NSTAR's review include consideration of the intangible and public benefits that would result from an award to the City of Newton/ Cornerstone. The arrangements between the City of Newton and Cornerstone Corporation would result in preservation of the entire south parcel and more than 50% of the north parcel as open space. The residential development, which includes a significant number affordable housing units, would be carried out in a manner that protects environmentally sensitive features of the site.

We believe that the public benefits to the communities of Newton, Boston and Brookline are of such great value that they merit the selection of our proposal over other bids even if the dollar amount of those other bids might exceed ours by a modest amount.

Please do not hesitate to contact me if you have any questions about the bid submitted by the City of Newton and Cornerstone Corporation.

Very truly yours

David B. Cohen

Darrell MacLean Kessler Woods LLC 823 Pleasant Street Norwood, MA 02062

Re:

LaGrange Property, Newton

Dear Mr. MacLean:

Reflecting our recent communications and discussions, you were informed on June 26, 2003, that the bid you submitted for the above property was the high qualifying bid.

Based on our subsequent meeting on June 30<sup>th</sup>, you recognized your obligation to enter into a Purchase and Sale Agreement for such property not later than July 14<sup>th</sup>, 2003, in accordance with the terms of the Offering Memorandum governing the sale process. At that time, a shared desire to expedite the execution of the Purchase and Sale Agreement was expressed by all parties.

In accordance with discussions among the legal representatives, certain issues were clarified in the proposed Purchase and Sale Agreement, and certain additional information was provided to you regarding the property. It is the position of Boston Edison Company that, as of Friday, July 11, 2003, there are no obstacles to the execution of the Purchase and Sale Agreement consistent with the terms of the Offering Memorandum.

Accordingly, this letter is to notify you that you have until close of business at 5 P.M. on Monday, July 14, 2003, to execute and deliver the Purchase and Sale Agreement in the form attached, and deliver the deposit in the amount of \$2,476,000.20, in the form required under the terms of the Purchase and Sale Agreement.

Failing this, in accordance with the rights reserved under the Offering Memorandum, Boston Edison Company will proceed to notify the next highest bidder of its selection as the proposed purchaser of the LaGrange Property.

Very truly yours,

**BOSTON EDISON COMPANY**

Re: Land of Boston Edison Company on LaGrange and Vine Streets, Newton and Boston, Massachusetts

Dear Neven:

As we have now received the redraft of the Purchase and Sale Agreement and the revisions to the Title Commitment from Richard Murphy, we can now confirm our agreement on the form of each.

We now have had the opportunity to discuss with our clients the two (2) issues which were the focus of our conversations this morning, namely the environmental issue and the title/survey issue, both of which, we believe, will be issues for any buyer.

As to the environmental issue, while my clients intend to do further study, they have been made to understand that Boston Edison Company will not accommodate a contingency for environmental matters in the Purchase and Sale Agreement. Our clients are prepared to assume that risk, provided that reliance letters can be obtained from Foster Wheeler Environmental Corporation and Lightship Engineering.

With regard to the title/survey issue, we have concluded our discussions with Kevin Creedon of Fidelity National Title Insurance Company. Based on that conversation, and the revisions to the title commitment to follow, we are prepared to sign off on all title issues reflected in the Commitment with the exception of Items 7,9,12,13,14 and the note following Item 16 of the Schedule B exceptions, the locations of which cannot be ascertained at this time without the involvement of a surveyor. Since these items may have a significant impact on any proposed development (whether by my clients or any other prospective purchaser), and may materially affect the value of the property, my clients are not prepared to assume this risk without some limited further investigations. My clients have made arrangements with an engineering furn, who ( with access now authorized by Boston Edison Company beginning tomorrow) has agreed to complete before the end of this week enough survey work so as to eliminate the uncertainty surrounding this issue. My clients are prepared to do this work at their cost and expense and are willing to share the results with Boston Edison Company.

Therefore, I propose the following:

(a) We have agreed upon the final form of the Purchase and Sale Agreement.

BOI 15589338.2

Neven Rabadjija, Esquire July 14, 2003 Page 2

- (b) Boston Edizon Company has now authorized our surveyor to go on to the property to perform this limited survey work; and
- (c) On or before 5:00 p.m. on Friday, July 18, 2003, after our satisfactory review of this information, our clients will sign the Purchase and Sale Agreement in the form agreed and deliver to the Escrow Agent in bank or certified funds the balance of the deposit required under the Agreement.

We make this proposal in an effort to be sensitive to your expressed concerns regarding the bidding process. We do so based on our belief, which we hope you share, that this proposal represents the least invasive mechanism to allow Boston Edison Company to achieve a sale of the Property at the bighest price in the shortest period of time.

Accordingly, we formally request the agreement of Boston Edison Company to an extension of the time for execution of the Purchase and Sale Agreement from 5:00 PM July 14 2003 to 5:00 PM July 18, 2003 in order to implement this proposal. Would you please acknowledge Boston Edison's agreement by signing and returning to me by fax a copy of this letter.

Thank you for your courtesy and cooperation in this matter..

Very traly yours.

THE MUMBE

#### BY FAX and FIRST CLASS MAIL

Richard H. Murphy, Jr. Murtha Cullina LLP 600 Unicorn Park Drive Woburn, MA 01801

Re:

Land of Boston Edison Company on LaGrange and Vine Streets, Newton and Boston, Massachusetts

Dear Rick:

Based upon the results of the preliminary survey work, it is clear that Kessler Woods, LLC, on behalf of itself and its investors and lenders (the "Buyer"), is not in a position to go forward at this time with the execution of a purchase and sale agreement. These matters include the encroachment of neighbors onto the property, the impact of recorded encumbrances on the use of lots on the Preliminary Subdivision Plan, the location and status of Vine Street, location of boundaries and other monuments, and other matters which would be disclosed by an ALTA/ACSM survey. NSTAR has made it clear the no further extensions will be allowed for Buyer's review of these matters.

Since neither the title insurance commitment nor copies of the title exception documents were provided to bidders, and since no instrument survey was available to bidders, it was not possible to determine or address these issues in advance of the bid selection, and we believe that any sophisticated purchase of real estate would have similar concerns upon review of the title documents.

In light of the foregoing, and in an effort to allow NSTAR to proceed to sell the property to another interested party without delay, the Buyer respectfully requests return of its initial deposit of \$25,000.

city truly yours.

Thank you for your courtesy and cooperation in this matter.
